

MAKING EVENT RENTALS BETTER...
ONE STAKE AT A TIME.

WELCOME TO JK RENTALS

FRAME TENTS

MAKING EVENT RENTALS BETTER... ONE STAKE AT A TIME.

At JK Rentals, we provide everything you'll need to make sure your event is a success. Whether it's a family picnic or an outdoor concert, we supply tents to fit any size and any type of occasion.

With over 20 years of experience, you can rest assured that you'll always receive the highest quality tents matched with outstanding customer service - guaranteed.

We'll work with you to determine which tent package best fits your needs. Using PartyCAD, our design team can create a layout of your event to help you visualize the event before a stake is ever driven.

Located just north of Milwaukee, JK Rentals caters to the entire U.S. Call us today or visit our website!

NO CENTER POLES MAKE FOR
OPTIMAL OPEN SPACE UNDER TENT

JK Rentals not only installs some of the industry's top quality frame tents, but also manufactures all tent tops in-house. What this means to our customers is that they will always have durable tents that will not only keep the rain out, but are also aesthetically pleasing. The available colors JK Rentals offers for tops are as varied as the sizes we can build. Frame tent sizes range from 10' x 10' to 40' x 80'. Frame tents are optimal for open space underneath the tent, because there are no center poles in this style of tent. Together with sidewalls (easily installed and removed), frame tents make the perfect temporary shelter for a smaller event. With custom-designed mesh sidewall and dividers, these tents can also be well-suited for cooking or serving food. JK rentals also custom manufactures tents for those customers who want to own a tent, including tents with company logos printed on.

POLE TENTS

SIMPLE
AND
EFFECTIVE

Perhaps one of the simplest, yet effective tent installations is the pole tent. The style of these tents is apparent in the name itself, erected through the use of taller center poles. Pole tents can come in many different shapes and sizes, but are more traditionally seen in a rectangular outlay with a triangular profile. JK Rentals has been installing this type of tent since the company's inception. More effective staking and tensioning practices allow these tents to withstand fairly harsh weather conditions, allowing for more long-term installations. JK Rentals has also advanced over the recent years in the manufacturing of pole tents and currently produces some of the industries finest. Our inventory includes pole tent profiles in 20, 30, 40, 50, 60, and 80 feet, amassing to unlimited lengths due to our ability to manufacture our own canopies. Not only does production allow for unlimited lengths of tent, but color as well. Currently, more traditional colors like red, blue, and white account for the majority of our inventory, but purple, yellow, and green are available in our smaller profiles (30 and 40 foot widths).

BANDSHELLS

PERFECT FOR OUTDOOR
CONCERTS, CEREMONIES,
GUEST SPEAKERS, AND
OTHER STAGE EVENTS.

One of the more unique tents available in the industry today is the Bandshell. This stage canopy, manufactured by Anchor Industries®, is meant to provide an aesthetically-pleasing shelter for a band, ceremony, guest speaker, or anything that would be done on a stage in an outdoor setting. JK Rentals offers two different size bandshells. The "large" bandshell is approximately 96 feet wide and 76 feet deep. Underneath the bandshell is enough room to place a 40' x 40' stage, perfect for larger concerts. If an event is meant to be a bit smaller, we offer a bandshell measuring 53 feet wide and 44 feet deep. A slightly smaller stage is normally placed under this particular canopy, the most common being 20' x 32'. JK Rentals is one of only a few rental companies that offer this style tent, which explains why it typically hasn't been seen very often. For an outside concert, the bandshell is definitely sure to make spectators take notice.

CENTURY® (TENSION) TENTS

A great tent that provides for both shelter from weather conditions as well as a pleasing look is the tension tent. Anchor Industries® is the manufacturer of the Century® line of tension tents, which is the majority of what JK Rentals carries in inventory. This style of tent is perfect for just about any event, from a small backyard wedding to a larger corporate event. Another reason most customers opt for a Century® tent rather than a traditional pole tent, other than its impressive visual appeal, is the fact they are engineered to withstand harsher weather conditions. As a matter of fact, with JK Rentals professional installation, these canopies can withstand winds in excess of 70 miles/hour. Our extensive inventory includes Century® tents in profiles 30, 40, 60, and 80 feet in width and over 500 feet in length for each profile.

VISUAL APPEAL
ENGINEERED TO
WITHSTAND HARSH
WEATHER CONDITIONS

NAVI-TRAC® STRUCTURE

STABILITY AND SIMPLICITY,
MORE USABLE SQUARE FOOTAGE

The use of traditional canopies, such as pole and frame tents, has been a mainstay in the rental industry since its basic inception. However, with the increasing popularity of large profile structures, there needed to be something to bridge the gap between smaller frame tents and these fabric structures. Anchor Industries® engineered and produced what is known as the Navi-Trac® frame tent. This frame system combines the stability of a Clear Span structure with the simplicity of a traditional frame tent. Also, the use of a gable end allows for more usable square footage for things such as projection screens and stages that can go tight to the end of the tent. JK Rentals carries this style tent in both 40 foot and 50 foot widths and to nearly any length in 20 foot increments.

CLEAR SPAN STRUCTURES

An uncontrollable factor that may affect any outdoor event is obviously the weather. Severe weather, rainy conditions, snow, and sleet can all play a part in limiting the success of any event. The rental industry's solution to unpredictable weather conditions is the installation of Clear Span structures. The reason these temporary buildings are becoming so popular is due to their ability to create a climate-controlled environment conducive for having great conditions for any event. Also, because of the engineering of these professionally built tents, the strength and durability are much greater than that of traditional pole and tension tents. Furthermore, a Clear Span is free-standing, which allows for an obstruction-free environment inside the tent for such things as concerts, parking cars or motor homes, or just a simple corporate function. JK Rentals has become one of the industries best and most efficient companies working with these precision installations in recent years. With our current inventory, we are able to install structures ranging in size from 20 to 30 meters (66 to 100 feet) in width, and spanning a length of 140 meters (315 feet). If an event requires other sizes than what we carry in inventory, we have the ability to obtain any size to complete the job.

CREATE A CLIMATE-CONTROLLED ENVIRONMENT

120' WIDE SERIES 2000 (TENSION) TENT

MAKE A STATEMENT WITH THIS ONE-OF-A-KIND TENT

Designed and manufactured by Aztec, this twin-pole tension-style tent peaks to 40 feet, while spanning an impressive 120 feet in width and over 1200 feet in length. Also, the side poles stand 10 feet tall, providing more clearance to drive under the tent with machinery or other vehicles. There are a very limited number of these in existence today, but JK Rentals has access to 5 of only 7 ever made. Properly designed vinyl tops, along with our ability to properly maintain/repair these tents, ensures that our customer is getting a top-quality product that is sure to receive the attention and appreciation it deserves.
